

# Daler Khamzaev

## Senior Android Developer

I started programming in high school, such as playing and creating games. My first project was graphic builder on Pascal language, then I overwrote in C++/Qt. When I went to university I learned Java/Android and the first application I created was Graphical Mathematical. I am proficient on creating solutions for UI/UX experience and love to study new skills and gaining new experiences. I would consider to relocate to Europe, USA. I am a winner of UI/UX Telegram contest 2021. My own project, calculator that was my first program on Android: <https://play.google.com/store/apps/details?id=com.sunplacestudio.myapplication> My game that I made on LibGDX: <https://play.google.com/store/apps/details?id=com.sunplacestudio.threeinrow> Another project that I worked is L.A.TACO that I made for Los Angeles for taco lovers. I made this in company using Kotlin, Retrofit, Room. Link of this app: <https://play.google.com/store/apps/details?id=com.lataco.mobile> Beside this I made personal cabinet of abonent for company ORION EXPRESS with Kotlin, KMM Library for networking, Kotlin Coroutines. Also I wrote calculator on C++, Qt.

## SKILLS

Android SDK

Kotlin

Java

Kotlin Multiplatform  
Mobile(KMM)

Koin

Hilt

Dagger2

Room

Kotlin Coroutines

LibGDX

Ktor

Retrofit

SqlDelight

RxJava2, 3

MVVM

MVI

Android Jetpack Compose

## WORK EXPERIENCE

### Senior Android Developer Exante

05/2022 - Present

Remote

I was responsible to update main code for a few application. I remade it using Android Jetpack Compose and Koin. I made banking apps and trading apps here. There was 5 android developers, iOS developers, product owner, designers, ets in my team. Full product crew.

Achievements/Tasks

- refactoring main code to Compose and MVI
- code review

### Senior Android Developer Luxoft

06/2021 - 05/2022

Moscow, Russia

I was responsible for delivering a mobile app for Leroy Merlin. I created the whole UI/UX. I was also involved in networking and database development. The tech behind includes, but not limited to: Kotlin, Kotlin coroutines, ObjectBox for database, Jetpack Compose for UI, that I made, Retrofit2

Achievements/Tasks

- develop whole UI via Jetpack Compose
- work with database via ObjectBox
- work with network via retrofit2

### Middle Android Developer Sputnic

02/2019 - 06/2021

Moscow, Russia

I made an app installer as Play Market. I wrote this application under control of a Senior Android Developer. I made it from scratch. Also I worked on Sputnik browser. Tech stack: Kotlin, Kotlin coroutines for multithreading, Room for database, Koin for DI, MVVM architecture, Retrofit2 for network. Also in this project I worked with QR code scanning using ZXING and camera.

Achievements/Tasks

- develop whole UI/UX
- develop database via Room
- develop networking via Retrofit2

### Android Developer Spase1s

09/2018 - 06/2021

Moscow, Russia

I worked on application that control robots via bluetooth and Wi-Fi, I have created the whole app from scratch. The tech stack: Java, RxJava, Self-wrote database queries with SqlOpenHelper, Koin, MVVM. Also I worked in this project with sockets for scan network, made custom components extend from View.

Achievements/Tasks

- develop application from zero
- develop whole UI/UX
- develop sockets to work bluetooth and Wi-Fi

## PROJECTS

### Three in Row Game (01/2022 - 05/2022)

- I made this game with my friend art designer, all game was made on Kotlin with Kotlin Coroutines. It's game three in row. I made it from scratch.
- Tech stack: Kotlin, Kotlin Coroutines, LibGDX, Firebase, Google Play Billings, Ktor
- Link to project: <https://play.google.com/store/apps/details?id=com.sunplacestudio.threeinrow>

## LANGUAGES

Russian  
*Native or Bilingual Proficiency*

English  
*Professional Working Proficiency*

## INTERESTS

Games on PS5 and PC

Music

Movies

Making games on LibGDX

Coding

## PROJECTS

### Graphical Mathematical Calculator (05/2017 - 10/2018)

- My very first program for Android. I made it from scratch, totally by myself. It can build graphics, draw it and all stuff for engineer calculator.
- Tech stack: Java, Room.
- Link to project: <https://play.google.com/store/apps/details?id=com.sunplacestudio.myapplication>

### Exante projects (05/2022 - Present)

- I remade here a few application for banking and trading stuff. I made refactoring in common.
- Tech stack: Kotlin, Kotlin Coroutines, Room, Koin, Java, RxJava.

### L.A.TACO (02/2020 - 12/2020)

- It was part time job, where I worked with legacy, I almost remade all UI/UX. Here was standard command like product, designer, another developers, etc. This application for TACO lovers in L.A.
- Tech stack: Kotlin, Kotlin Coroutines, MVI, MVVM, CLEAN, Koin, Retrofit, Room.
- Link to project: <https://play.google.com/store/apps/details?id=com.lataco.mobile&hl=ru&gl=US>

### My TVcard (06/2021 - Present)

- Part time job, where I have learned a lot of new, I made this application from scratch, all backend work I made with KML - Kotlin Multiplatform Library, also I made application for iOS. So, my library, what I have written work on Android and iOS.
- Tech stack: Kotlin, Kotlin Coroutines, MVI, Koin, Kotlin Multiplatform Mobile, Ktor, Firebase, Android Jetpack Compose.
- Link to project: <https://play.google.com/store/apps/details?id=com.telekarta.lkabonentandroid&hl=ru&gl=US>

### LM Driver App (06/2021 - 05/2022)

- Full time job, I came to project and we overwrite whole application, I made all UI/UX experience and part work with databases and network, here was standard crew: product owner, analytics, designers, other android developers, etc.
- Tech stack: Kotlin, Kotlin Coroutines, MVI, Retrofit, Firebase, Room, Hilt.

### Sputnik App Installer (01/2018 - 11/2019)

- I made installer like play market, crew like in other companies, than company was closed and I went to Telekarta, part time job.
- Tech stack: Kotlin, Kotlin Coroutines, MVVM, Retrofit, Firebase, Room.

### IronPay (07/2018 - 10/2018)

- I made application, that works with injenico terminals for citilink for couriers from scratch, it's internal project of citilink.
- Tech stack: Java, RxJava2, SQLiteOpenHelper.

### IronRobot (01/2018 - 06/2020)

- My first project in my first company, internal project too. In this project I worked with bluetooth and WI-FI.
- Tech stack: Java, RxJava2, Hilt, SQLiteOpenHelper.

## EDUCATION

### applied computer science in business

#### Education Moscow State University of Transport (MIIT)

09/2018 - 05/2022

Russia, Moscow

##### Courses

- |                      |                       |
|----------------------|-----------------------|
| □ programming C#     | □ work with database  |
| □ product management | □ information systems |
