I started programming in high school, such as playing and creating games. My first project was graphic builder on Pascal language, then I overwrote in C++/Qt. When I went to university I learned Java/Android and the first application I created was Graphical Mathematical. I am proficient on creating solutions for UI/UX experience and love to study new skills and gaining new experiences. I would consider to relocate to Europe, USA. I am a winner of Ui/UX Telegram contest 2021. My own project, calculator that was my first program on Android: <https://play.google.com/store/apps/details?id=com.sunplacestudio.myapplication> My game that I made on LibGDX: <https://play.google.com/store/apps/details?id=com.sunplacestudio.threeinrow> Another project that I worked is L.A.TACO that I made for Los Angeles for taco lovers. I made this in company using Kotlin, Retrofit, Room. Link of this app: <https://play.google.com/store/apps/details?id=com.lataco.mobile> Beside this I made personal cabinet of abonent for company ORION EXPRESS with Kotlin, KMM Library for networking, Kotlin Coroutines. Also I wrote calculator on C++, Qt.

WORK EXPERIENCE

Senior Android Developer Luxoft

06/2021 - Present

Moscow, Russia

I was responsible for delivering a mobile app for Leroy Merlin. I created the whole UI/UX. I was also involved in networking and database development. The tech behind includes, but not limited to: Kotlin, Kotlin coroutines, ObjectBox for database, Jetpack Compose for UI, that I made, Retrofit2

Achievements/Tasks

- develop whole UI via Jetpack Compose
- work with database via ObjectBox
- work with network via retrofit2

Middle Android Developer Sputnic

02/2019 - 06/2021

I made an app installer as Play Market. I wrote this application under control of a Senior Android Developer. I made it from scratch. Also I worked on Sputnik browser. Tech stack: Kotlin, Kotlin coroutines for multithreading, Room for database, Koin for DI, MVVM architecture, Retrofit2 for network. Also in this project I worked with QR code scanning using ZXING and camera.

Achievements/Tasks

- develop whole UI/UX
- develop database via Room
- develop networking via Retrofit2

Android Developer Spase1s

09/2018 - 06/2021

I worked on application that control robots via bluetooth and Wi-Fi, I have created the whole app from scratch. The tech stack: Java, RxJava, Self-wrote database queries with SqlOpenHelper, Koin, MVVM. Also I worked in this project with sockets for scan network, made custom components extend from View.

Achievements/Tasks

- develop application from zero
- develop whole UI/UX
- develop sockets to work bluetooth and Wi-Fi

SKILLS

Android SDK

Kotlin

Java

Kotlin Multiplatform Mobile (KMM)

Koin

Hilt

Dagger2

Room

Kotlin Coroutines

LibGDX

Ktor

Retrofit

SqlDelight

RxJava2, 3

MVVM

MVI

Android Jetpack Compose

EDUCATION

applied computer science in business

Education Moscow State University of Transport (MIIT)

09/2018 - 05/2022

Russia, Moscow

Courses

- programming C#
- product management
- work with database
- information systems

LANGUAGES

Russian

Native or Bilingual Proficiency

English

Professional Working Proficiency

INTERESTS

Games on PS5 and PC

Music

Movies

Macing games on LibGDX

Coding
