Dushanbe, Tajikistan

I am professional Senior Android Engineer with a lot of experience in Android, iOS and Multiplatform development with about 5 years' experience. My main goal is to evolve as an engineer and grow my expertise! I'm intended to relocate.

Hard Skills

- Swift, Kotlin, Java
- KMM, Compose, Android Jetpack, Kotlin Coroutines, RxSwift, RxJava, RxKotlin, SwiftUI, SQLDelight, Room, Koin, Dagger2, Hilt, Ktor
- MVI, MVVM
- Firebase
- SOLID, KISS
- XCode, Android Studio, Git

Soft Skills

- Communication
- Team work
- Problem-solving
- Critical thinning
- Time management

Experience

Exante:

- Refactoring main page app, that's increased application performance. Removed all old legacy and remade main logic of update information on main page. Loading of main page became faster in 2 times.
- Support main code base and helped in code review, that helped increase value of code.

Leroy Merlin

- Refactoring whole application to new tech stack, that helped to improve UI, UX experience
- Implementation database solution, that increased performance of the whole application, that helped us to use smaller ram of user mobiles phones.

Sputnic

- Developing analog of Play market, that helped us to update and release products to users. This app I made from scratch.
- Refactoring main page of the browser that improved user experience, through removing old legacy and inject new frameworks like Retrofit

4Taps

- Total refactoring of L.A.TACO app, that gave users new features and experience, like personal cabinet with favorite restaurants, and added new page with YouTube videos from channel of L.A.TACO.

Space1s

- Develop application to control robots, that worked on Arduino, this solution helped to control them through Sockets and Bluetooth.
- Develop application that helped courier to accept payments from bank cards through mobile phones. Now couriers can easily accept payment, when they delivered goods for clients.

Education

Applied computer science in business
Moscow State University of Transport (MIIT)
Bachelor of Technology – Btech

Projects

Telekarta App for iOS and Android

This app is Personal cabinet, where clients can change their subscriptions, contact to support, look tv programs, update personal info and check contract info. This full REST API app.

- Developing Android and iOS apps from scratch using KMM, Compose, Ktor, SwiftUI, MVI, Firebase
- Publishing all apps to Google Play and App Store

Game Three in Row

This is my personal game with a lot of animations, where you can build diamonds in one row or column.

- Designed and developed whole game using LibGdx, Kotlin, Coroutines, Firebase
- Developing model generator for the whole app, like diamonds generation, back game animation.

Sitilink App for payments

This app works with INGENICO terminals through Bluetooth and Sockets.

- Designed and developed app for payments via INGENICO terminals
